Vice Admiral Rufus L. Taylor
Deputy Director
Central Intelligence Agency
Virginia 20505

August 16, 1968

Dear Admiral Taylor:

I am taking the liberty of forwarding copies of Bendix Aerospace Systems Division's latest brochure because I thought you and General Richard Collins might be interested in the disciplines brought together in our Military Concepts Team.

The Bendix Aerospace Systems Military Concepts Team has been organized to provide a complete package of disciplines to assist in the conceptual design of future armed forces. Its talents include knowledge of the threat to our armed forces at each echelon of command, knowledge of our own weapons development, and a proven capability in mathematical modeling and simulation techniques. Moreover, this group is backed by those technologies we believe are most important for qualitative improvement of armed forces. As you know, Bendix Corporation is a leading firm in production of equipment related to command control, target acquisition and surveillance, and mobility. The research done by each of its divisions is readily available to the Military Concepts Team.

Should you decide that the Bendix Aerospace Systems Division could be of assistance to the Central Intelligence Agency either in the design of intelligence systems or in the forecast of military threats, please be advised that Mr. Robert Jevon, our Marketing Representative in Washington, or I would be pleased to provide additional data on our capabilities.

Sincerely,

A handwritten signature in dark ink, appearing to read "E. E. Bellonby", written in a cursive style.
